

# You can't wrap them in cotton wool, but

**you can  
stop your  
child getting  
MEASLES,  
MUMPS and  
RUBELLA.**

The MMR vaccine protects  
against these diseases.

MMR is recommended for  
children aged 12 months  
and is free from your GP.

Even if your child is older  
it's not too late to vaccinate.

**Protect, Prevent, Immunise.**

For more information  
talk to your GP or visit
