

Coronavirus  
**COVID-19**  
Public Health  
Advice

# If your doctor says you don't need an antibiotic, **that's ok.**

Many common illnesses don't require an antibiotic.  
Your body will be able to fight off the infection on its own.

Taking antibiotics when you don't need them  
can harm your health and cause superbugs.  
Antibiotics don't treat COVID-19.
