Needs Assessment and Care Planning
Personalised Care

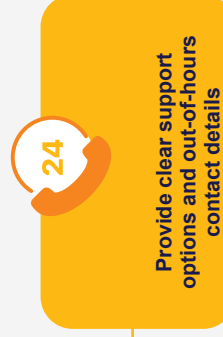

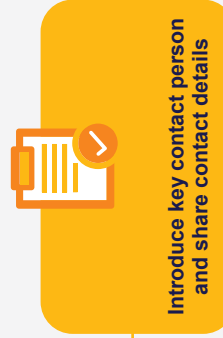

Engage in needs assessment and care planning processes to optimise wellbeing and quality of life.

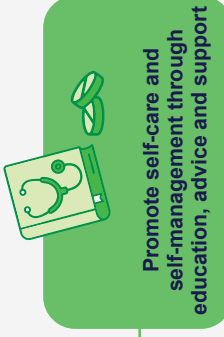

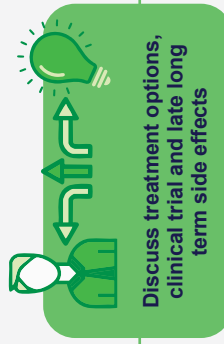

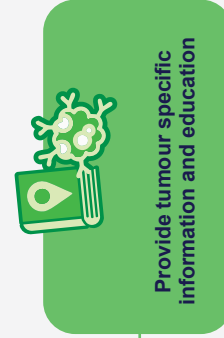

Cancer Survivorship Patient Pathway

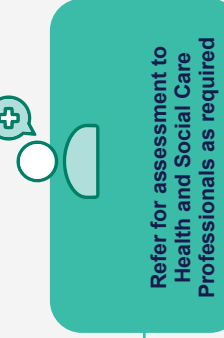

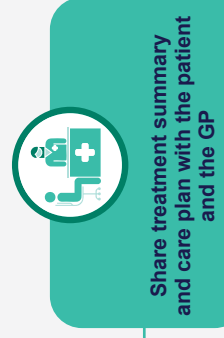

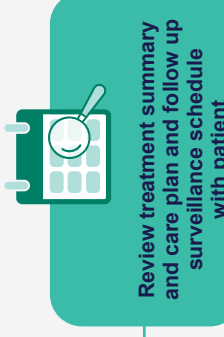

1 Point of Contact - Consistent Contact

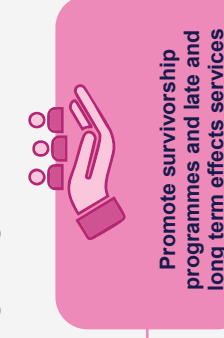

2 Education and Information - Empowered Patients

3 Needs Assessment and Care Planning - Personalised Care

4 Support Programmes, Places and People - Wellbeing & Ongoing Support

Note: Most elements outlined in this pathway are intended to provide general guidance and support service planning and are relevant across the entire cancer care continuum. Clinical judgment should be used to determine the most appropriate time for each element to ensure the patient receives the supports that they need.
